

AASHA – Data Collection, Access, and Dashboard Permissions Document

Project: AASHA – Digital Healthcare Management Platform for Rural India
Document Type: Data Flow & Dashboard Permissions Specification
Version: 1.0
Date: August 18, 2026
Prepared by: TrojanZeus

Table of Contents

- 1. [Introduction](#)
- 2. [Regulatory Compliance Overview](#)
- 3. [Information Collected by ASHA Worker on First Visit](#)
- 4. [Information Collected During Regular Interval Checkups](#)
- 5. [Information Shown to Doctor](#)
- 6. [Data Editing Permissions for Doctor](#)
- 7. [Data Flow and Permissions Summary](#)
- 8. [Compliance Notes for Dashboards](#)
- 9. [Key Takeaways](#)

1. Introduction

This document outlines the **complete data flow** for the AASHA platform, specifying:

- What information ASHA workers collect during **first visits** and **regular checkups**
- What information is **displayed to doctors**
- What information doctors can **edit**
- How all data collection and access **complies with Indian regulations** (DPDP Act 2023, IT Act + SPDI Rules, ABDM, CERT-In)

This specification ensures **patient privacy, data security, and regulatory compliance** while enabling effective healthcare management.

2. Regulatory Compliance Overview

All data handling in AASHA complies with the following Indian regulations:

Regulation	Applicability	Key Requirements
Digital Personal Data Protection Act (DPDP Act), 2023	Mandatory for all patient data	Consent, purpose limitation, data minimization, patient rights, encryption, breach notification
Information Technology Act, 2000 + SPDI Rules, 2011	Mandatory for medical data	SPDI classification, ISO 27001 compliance, encryption, access controls

Regulation	Applicability	Key Requirements
Ayushman Bharat Digital Mission (ABDM) Health Data Management Policy	Mandatory for digital health apps	ABHA integration, consent-based sharing, interoperability, encryption
CERT-In Cybersecurity Directions	Mandatory for all Indian entities	6-hour breach reporting, 180-day log retention, secure APIs

Note: HIPAA (U.S. law) is **not applicable** unless AASHA handles U.S. patient data.

3. Information Collected by ASHA Worker on First Visit

3.1 Common to All Patient Categories

The following information is collected during the **first visit for all patient types** (Pregnant Women, Infants, Elderly):

Personal Identification Information

- Full Name
- Date of Birth (DOB)
- Gender
- Guardian Name
- Guardian Relationship
- Primary Phone Number
- Alternate Phone Number
- Full Address (House, Street, Village, District, State, Pincode)

Physical Measurements

- Height (cm)
- Weight (kg)

Medical Information

- Patient Category (Pregnant Woman / Infant / Elderly)
- Allergies (if any)
- Chronic Conditions (Diabetes, BP, etc.)
- Previous Medical History

Vitals (Initial)

- Blood Pressure (Systolic/Diastolic)
- Blood Sugar (Fasting/PP)
- Temperature
- Pulse Rate

Documents

- Medical Reports (PDF/Images)
- Aadhaar Card (Optional, with separate explicit consent)

ABDM Integration

- ABHA Number (Ayushman Bharat Health Account)
- ABHA Consent for linking to AASHA

Regulatory Classification:

- Personal Identification = **Personal Data** (DPDP Act)
 - Medical Information + Vitals + Documents = **Sensitive Personal Data or Information (SPDI)** (IT Act + SPDI Rules)
 - **All data must be encrypted at rest and in transit**
 - **Explicit consent required for all data collection** (DPDP Act + ABDM)
-

3.2 Category-Specific First Visit Data

3.2.1 Pregnant Women

- Last Menstrual Period (LMP)
- Expected Due Date (EDD)
- Pregnancy Confirmation (Test Report)
- Previous Pregnancy History (if any)
- High-Risk Factors (e.g., Age >35, Previous C-Section)
- Initial Ultrasound Report

3.2.2 Infants (0-5 years)

- Mother's Name
- Birth Weight
- Birth Length
- Delivery Type (Normal/C-Section)
- Birth Complications (if any)
- Initial Vaccination Status
- Birth Certificate (Optional)

3.2.3 Elderly Persons (60+ years)

- Age Verification Document (if DOB unclear)
 - Comorbidities (e.g., Heart Disease, Arthritis)
 - Medication History
 - Mobility Status (Independent/Assisted)
 - Emergency Contact (Name + Phone)
-

4. Information Collected During Regular Interval Checkups

4.1 Common to All Patient Categories

The following information is collected during **regular follow-up visits** for all patient types:

Vitals Update

- Weight (kg) - Every visit
- Height (cm) - Every 3-6 months (if applicable)
- Blood Pressure (Systolic/Diastolic) - Every visit
- Blood Sugar (Fasting/PP) - Every visit (for diabetics)
- Temperature - If symptomatic
- Pulse Rate - Every visit

Symptoms & Observations

- Current Symptoms (e.g., Fever, Cough, Pain)
- General Health Observations (e.g., Fatigue, Weakness)

Medication Adherence

- Medication Taken (Yes/No)
- Side Effects (if any)

Medical Reports

- New Lab Reports (PDF/Images) - As available
- New Prescriptions - As available

Nutrition Tracking

- Dietary Intake (Food Groups Consumed)
- Nutrition Deficiencies Observed

4.2 Category-Specific Regular Checkup Data

4.2.1 Pregnant Women

- Fetal Heart Rate (Monthly)
- Fundal Height (Monthly)
- Ultrasound Reports (New) (As per schedule)
- Urine Test Results (Protein, Sugar) (Every visit)
- Contractions (As observed)
- Edema (Swelling) (Every visit)
- Fetal Movements (Daily, patient-reported)
- Next Checkup Date
- High-Risk Flags (e.g., Pre-eclampsia signs) (Every visit)

4.2.2 Infants (0-5 years)

- Weight (Monthly)
- Height/Length (Monthly)
- Head Circumference (Every 3 months)
- Vaccine Administered (Name, Date, Batch No.) (As per schedule)

- Next Vaccine Due (Every visit)
- Vaccination Side Effects (Post-vaccination)
- Motor Skills Milestones (Every 3 months)
- Cognitive Skills Milestones (Every 3 months)
- Speech/Language Milestones (Every 3 months)
- Breastfeeding Status (Exclusive/Partial/None) (Every visit)
- Complementary Feeding Started (Yes/No) (Every visit)
- Dietary Allergies (if any) (Every visit)

4.2.3 Elderly Persons (60+ years)

- Blood Pressure (BP) Trends (Every visit)
- Blood Sugar (Fasting/PP) Trends (Every visit)
- Oxygen Saturation (SpO2) (If symptomatic)
- HbA1c Levels (Every 3-6 months)
- BP Medication Adherence (Every visit)
- Arthritis: Joint Pain Scale (1-10) (Every visit)
- Mobility Status Update (Every visit)
- Fall Incidents (if any) (Every visit)
- Assistance Needed (e.g., Walking, Bathing) (Every visit)
- Cognitive Assessment (Every 6 months)
- Depression/Anxiety Signs (Every visit)

5. Information Shown to Doctor

5.1 View-Only Information (Doctor Cannot Edit)

Doctors have **read-only access** to the following information:

Patient Identification

- Name
- Age (Calculated from DOB)
- Gender
- Guardian Name + Relationship
- **Phone Number (Masked - Last 4 digits only)**
- **Address (Masked - Village + District only)**
- ABHA Number

Medical History

- Previous Medical History
- Allergies
- Chronic Conditions
- Patient Category

Vitals History

- All Historical Vitals (BP, Sugar, Weight, etc.)
- Vitals Trends (Graphs/Charts)

Medical Reports

- All Uploaded Reports (PDF/Images)
- Report Dates + Sources

Category-Specific Data

- **Pregnant Women:** LMP, EDD, Ultrasound Reports, High-Risk Flags
- **Infants:** Birth History, Growth Charts, Vaccination History, Developmental Milestones
- **Elderly:** Comorbidities, Medication History, Mobility Status, Cognitive Assessments

Monitoring & Reminders

- Upcoming Checkups
- Vaccination Due (Infants)
- System-Generated Insights (e.g., "BP Trend: Increasing")

Audit Information

- Last Modified By (ASHA Worker)
 - Last Modified Date/Time
-

6. Data Editing Permissions for Doctor

6.1 Editable Information (Doctor Can Modify)

Doctors can **add, update, or annotate** the following information:

Medical Diagnosis

- New Diagnosis (e.g., "Hypertension", "Gestational Diabetes")
- Existing Diagnosis (Correction)

Treatment Plans

- Prescribed Medications
- Dosage Instructions
- Treatment Duration

Medical Reports

- New Reports (Upload)
- Report Annotations (e.g., "Abnormal finding: X")

Vitals Verification

- Vitals Correction (if ASHA worker error)
- Vitals Notes (e.g., "BP measured in sitting position")

Monitoring Adjustments

- Checkup Schedule Changes
- Vaccination Schedule Updates (Infants)
- High-Risk Flags (Pregnant Women)

Nutrition Recommendations

- Custom Diet Plans
- Nutrition Notes (e.g., "Avoid iron-rich foods with calcium")

Referrals

- Specialist Referral Notes
 - Referral Reason
-

6.2 Non-Editable Information (Doctor Cannot Modify)

Doctors **cannot edit** the following information:

Patient Identification

- Name
- Date of Birth (DOB)
- Gender
- Guardian Details
- Phone Number
- Address

ABDM Details

- ABHA Number
- ABHA Consent

System-Generated Data

- Last Modified By (ASHA Worker)
- Sync Status

Consent Data

- Data Sharing Consent
 - Treatment Consent
-

7. Data Flow and Permissions Summary

The following table summarizes the **data flow and permissions** across ASHA workers and doctors:

Data Category	Collected by ASHA Worker?	Shown to Doctor?	Editable by Doctor?	Encryption Required?	Consent Required?
Personal Identification (Name, DOB, Gender)	✔ First Visit	✔ Read-Only	✗ No	✔ Yes	✔ Yes
Contact Info (Phone, Address)	✔ First Visit	✔ Masked	✗ No	✔ Yes	✔ Yes
ABHA Number	✔ First Visit	✔ Read-Only	✗ No	✔ Yes	✔ Yes
Physical Measurements (Height, Weight)	✔ First Visit + Regular	✔ Read-Only	✗ No	✔ Yes	✔ Yes
Vitals (BP, Sugar, etc.)	✔ First Visit + Regular	✔ Read-Only	✔ (Corrections Only)	✔ Yes	✔ Yes
Medical History (Allergies, Chronic Conditions)	✔ First Visit	✔ Read-Only	✔ (Add/Update)	✔ Yes	✔ Yes
Medical Reports	✔ First Visit + Regular	✔ Read-Only	✔ (Add/Annotate)	✔ Yes	✔ Yes
Pregnancy-Specific Data	✔ First Visit + Regular	✔ Read-Only	✔ (Add/Update)	✔ Yes	✔ Yes
Infant Growth & Vaccination Data	✔ First Visit + Regular	✔ Read-Only	✔ (Add/Update)	✔ Yes	✔ Yes
Elderly Chronic Condition Data	✔ First Visit + Regular	✔ Read-Only	✔ (Add/Update)	✔ Yes	✔ Yes
Nutrition Data	✔ First Visit + Regular	✔ Read-Only	✔ (Add/Update)	✔ Yes	✔ Yes
Treatment Plans	✗ No	✔ Read-Only	✔ (Add/Update)	✔ Yes	✔ Yes
Diagnosis	✗ No	✔ Read-Only	✔ (Add/Update)	✔ Yes	✔ Yes
Audit Logs	✗ (System-Generated)	✔ Read-Only	✗ No	✔ Yes	✗ No

8. Compliance Notes for Dashboards

8.1 ASHA Worker Dashboard Compliance

1. Data Collection:

- Collect **only minimum necessary data** (DPDP Act: Purpose Limitation).
- **Encrypt all SPDI** (IT Act + SPDI Rules).
- **Get explicit consent** for each data field (DPDP Act).
- **ABHA Integration is mandatory** (ABDM).

2. Data Storage:

- **Offline encryption** (SQLCipher for SQLite).

- **Sync only with consent** (ABDM + DPDP).

3. Access Controls:

- ASHA Worker can **only see/edit their assigned patients** (DPDP: Minimum Necessary Access).
 - **Audit all actions** (CERT-In: 180-day logs).
-

8.2 Doctor Dashboard Compliance

1. Data Access:

- **Consent-based access** (ABDM + DPDP).
- **Mask sensitive PII** (Phone, Address) (DPDP: Data Minimization).
- **Read-only for patient identity** (DPDP: Patient Rights).

2. Data Editing:

- **Only medical data can be edited** (Diagnosis, Treatment Plans, Reports).
- **Audit all edits** (CERT-In: Tamper-Proof Logs).
- **Cannot modify patient identity or consent** (DPDP: Patient Rights).

3. Security:

- **All SPDI encrypted** (IT Act + SPDI Rules).
 - **Role-based access** (DPDP: Minimum Necessary).
-

9. Key Takeaways

For ASHA Worker Dashboard:

- ✓ **Full data entry** (First Visit + Regular Checkups)
- ✓ **No access to doctor's notes** (DPDP: Minimum Necessary)
- ✓ **Offline-capable** with **encrypted local storage**

For Doctor Dashboard:

- ✓ **Read-only patient identity** (Masked phone/address)
- ✓ **Editable medical data only** (Diagnosis, Treatment, Reports)
- ✓ **No access to ASHA worker's personal notes** (unless shared via system)

Common Compliance Requirements:

- ✓ **All medical data = SPDI → Encrypted at rest + in transit**
 - ✓ **Consent required** for all data collection/sharing
 - ✓ **Audit logs mandatory** (180-day retention)
 - ✓ **ABHA integration mandatory** for all patients
-
